## ABOUT DEEKAY

DeeKay (b. 1989, South Korea) is an artist whose digital animations combine clean, minimal forms with expressive motion. Drawing on visual language from retro video games, his narrative-driven artworks sweetly simplify humanity's complexity. He briefly attended the School of Visual Arts, NYC, and then spent over a decade as a motion designer at companies including Google and Apple. He has been minting his artworks on blockchain since 2021. His work has been exhibited globally, at Sphere, Las Vegas (2025); Busan MoCA, South Korea (2024); and W1 Curates, London (2023), among others. His practice is guided by the principle that art should be universally accessible and resonant.
